I. Gray 22:38 (*Hamel*)
In the dream I floated on
The mist of desperation
The silent screams
Causing elevation

Follow me they cried
Coming from afar
The reasons they died
Don't know where they are

Tried to find a place to go
Where everybody smiles
There nobody knows
All the endless miles

Take me higher, take me far
Show me madness, show me stars
Show me where they are

Misguided direction
From the chosen few
Popular sedation
In the living room
Sail away to another day
We try to follow all you say
We try to hold our hands up high
Try to move along
But in the end all you say
Ends up being wrong

You can only take so much
Before the levee breaks
Hopeless fanatic look at me
Before it's too late

Sail away to another day
We try to follow all you say
Fill my mind all you want
I am breaking free
Leave behind my own thoughts
For all the world to see

Lead me on-Take me to that empty place
Lead me on-Take me to the deepest space
Lead me on-Journey high above our homes
Lead me on-Never feel you are alone

We arrive
We arrive

We arrive to that point in time
Come to find, we didn't think so
Endless minds, they make the bind
Are we blind, we didn't think so

If we now seize the day
And tomorrow runs away
We watch as the children play
Not knowing the world they make
We dream of old endless tales
Of the oceans we've tried to sail
If the clouds fall from the sky
The mist will gray within our eyes
Within our eyes

Shadows crept from the sky
Amazing wonder in our eyes
I find it hard, hard to stand
Asking myself who I am
I see what I cannot explain
I feel in awe, no more pain
Blinded by mist I cannot see
I feel so small in the grand scheme

You approach us – Though I can not see

You know us – How can this be
You make us – A mirror of me
You break us – To unlock the key

Lead me on – To another day
Lead me on – Out of the sea of gray
Lead me on – Should we follow, should we stay
Lead me on – Will you wish my dreams away

In the dream I floated on
The mist of desperation
Silent screams
Causing elevation

Follow me they cried
Coming from afar
The reasons they died
Don't know where they are

Tried to find a place to go
Where everybody smiles
There nobody knows
All the endless miles
Take me higher, take me far
Show me madness, show me stars

II-Wish 9:12 (*Hamel*)

I am drifting by the wayside
And moving through the points
To a distant horizon
To find my voice
I can't find my direction
I'm spinning round and round
So much confusion
From far above the ground

From the clouded visions
I focus on you
And I am asking myself
Just where the hell you are
All I need is to feel you
Feel you close to me
The points of light line up
As they shine down from the stars

I wish upon the stars
(I drift between the points)
To be where you are
(I am not that far away)
You seem so very far
(If you just take a look)
If I close my eyes
(Do you see)
and look up to the skies
I will see you
(I am here)
I will see you
(I am near)
Next to me
(I am all around)
Are you with me
(I am)
And they follow
And they follow
As I lay here I am with you
As I lay here I am with you

And they follow

And they follow

III-Glide 9:36 (*Rasche*)

I'm spinning quickly out of control
Feeling like I am lost with no where to go
I can see my home it's empty and cold
Nothing left within the webs of sin

Memories flash quickly throughout my head
Smell the incense burn ash burns through my bed
Close my eyes real tight now, pretend that I'm dead
Just a few minutes more and it will all end

No reason to chase me
Running on full steam ahead
And I'm not coming back again
I know there is a life for me
No laying on my back
and giving my love out for free
No more pain, no more insane game
I'll take control of my life
I'll take my own destiny
Watch me fly, watch me glide
I will spread my wings
and soar along the eagles in the sky
I'll fly watch me glide
I'll fly watch me glide
Like an eagle watch me glide

IV-Arrival 36:04 (*Hamel*)

Part 1 – Echo of Spheres

We whisper knowledge to you
All the secrets of all the worlds
And we hold in our hands all that you know
All the little pieces, all the little reasons
Life is life

Time will tell if we're ready
Time will tell if we're steady
Cast away all your doubt
What you think it's about changes
All the little pieces, all the little reasons
Life is life

Show me how to live – I think that I am ready now
Show me how to live- If you can just show me how
Show me how to live-Wont you please lead the way
Show me how to live-Cast the light today

Part 2-Manifest

Show me what to give
Show me what to give

And I lay by the river
Under the moon
I await transition
I hope it's coming soon

Time after time when I'm losing my mind
I close my eyes
I feel you sending me through
Day after day when I'm losing my way
I can't believe in something
That was never true

Life's beginnings
So far away
We are all connected
Outside the world we stay

Time after time when I'm losing my mind

I close my eyes

I feel you sending me through

Day after day when I'm losing my way

I can't believe in something

That was never true

Show me what it is

Show me what it is

Part3-Dawn

Step outside eternity and

Universal boundaries

Steady my hand

I see you through all, they call

I try to see I cannot be

The emptiness inside me

Steady my hand

I see you through all, they call

All the little pieces

All the little reasons

Fill the corners of our lives

All the little pieces

All the little reasons

Have no concept of our time

All the little pieces

All the little reasons

Bring together you and I

All the little pieces

All the little reasons

Only matters in our mind

We have traveled so far

Long before you were born

Countless worlds we have seen

Before your space was torn

With all we have learned
Now the day is new
We unlocked the secrets
That hide inside you

Is this the dawn of a new age
The odysseys of life
Constantly moving all around us
This time we arrive

All the little pieces
All the little reasons
Fill the corners of our lives
All the little pieces
All the little reasons
Have no concept of our time
All the little pieces
All the little reasons
Bring together you and I
All the little pieces
All the little reasons
Only matters in our mind

I pass now the light to you
I pass now the light to you
